

TECHNICAL DATA SHEET

PEG-100

Polyethylene glycol

PEG-100 is used as various purpose like, a moisturizer, an inorganic salt solutizer and a viscosity regulator in the daily chemical industry. Also used as softening agent and antistatic agent in textile industry; Used as a wetting agent in the paper and pesticide industries. It can be used as the raw material of ester surfactant. It can be used as solvent, cosolvent, o/w emulsifier and stabilizer. It can be used as a medium for organic synthesis and a heat carrier with higher requirements.

Basic Properties:

Appearance	Colorless liquid
pH Value	-
Solubility:	Soluble

Package and Storage:

IBC drum, 200kg iron drum, 50kg plastic drum packing. This series of products are non-toxic and non-flammable, and are stored and transported as general chemicals. Store in a dry and ventilated place. The shelf life is two years.
